Seattle, WA • 516-613-1158 • dadhaap@gmail.com • [linkedin.com/in/dashaa](https://www.linkedin.com/in/dashaa)

EXPERIENCE

Nest Solutions LLC - Forward Deployed Engineer

09/2025 - Present

- Partnered with 3 startup and SMB clients to lead technical discovery sessions, defining MVP scope, system architecture, and delivery timelines for SaaS and AI-driven applications, delivering solutions 2–3 weeks ahead of schedule.
- Integrated LLM APIs and built chatbot solutions for a client, automating customer-facing workflows and reducing manual response handling for operations teams.
- Maintained and optimized CI/CD pipelines and AWS infrastructure across 4 client projects, improving deployment consistency and reducing environment-related issues across staging and production.
- Managed 2–3 concurrent client engagements across AI, SaaS, and e-commerce platforms, coordinating technical delivery and stakeholder communication to keep implementations on schedule.

AND GLOBAL Pte Ltd - Software Engineer

06/2024 - 08/2025

- Developed customer-facing financial dashboards in React/TypeScript for banking platforms used by ~40 institutions across Asia, implementing secure authentication and real-time data synchronization.
- Built workflow automation integrations using n8n, connecting banking applications to loan approval, KYC verification, and collateral valuation systems, reducing manual handoffs between operations teams and backend workflows.
- Implemented secure webhook orchestration with JWT and React Query cache management, ensuring task inbox synchronization and maintaining data consistency across distributed banking operations.
- Optimized client-side data fetching with custom React hooks and TanStack Query, reducing redundant API calls by ~30% and improving dashboard responsiveness.

PCDP LLC - Frontend Developer

09/2023 - 06/2024

- Optimized website performance through code refactoring and asset compression, reducing average page load time from 4.2s to 1.8s and improving Core Web Vitals scores, leading to 25% increase in organic search traffic.
- Developed dynamic search and filtering features across bilingual EN/MN platforms using React and Node.js, enabling users to navigate project portfolios and service listings via REST API queries.
- Created automated reporting system using Google Sheets API to replace manual data entry, reducing weekly reporting time by 6+ hours and eliminating human error in financial tracking workflows

PROJECTS

Campus Connect - Full Stack Serverless Application | [Link](#)

05/2025 - 12/2025

- Identified the gap in campus peer-to-peer commerce and built a full-stack marketplace supporting physical and digital goods, integrating Stripe payments, webhook validation, and role-based access for students and administrators.
- Developed responsive React frontend with TanStack Query for async data fetching, caching, and error handling.
- Implemented JWT authentication and role-based access control for users and administrators
- Architected infrastructure using AWS SAM and CloudFormation for automated deployment and scaling
- Built real-time chat and notifications using Firebase to improve user experience and engagement

Ember - Health Mobile App

12/2025 - 05/2026

- Architected cross-platform React Native/TypeScript habit tracker with Firebase authentication, REST APIs, and Expo Router for iOS/Android.
- Integrated Apple HealthKit and Android Health Connect auto-tracking for steps, distance, calories, and sleep with timezone-safe background sync.
- Implemented real-time shared routines with AWS AppSync GraphQL subscriptions, exponential backoff reconnects, optimistic cache updates, and Jest-tested domain logic.

EDUCATION

Adelphi University | GPA 3.96

Garden City, NY

Computer Science B.S (Cybersecurity Minor), FALL 2025

Adelphi National Award, Presidential Scholarship, Dean's List

TECHNICAL SKILLS

Languages: JavaScript (TypeScript), Python, Java, C/C++, SQL

Frontend: React, Next.js, React Native, TanStack Query, Zustand, Tailwind CSS

Backend: Node.js, Express.js, Flask, RESTFUL APIs, JWT Authentication, Microservices,

Cloud & DevOps: AWS (Lambda, API Gateway, DynamoDB, S3, AppSync), CloudFormation, CI/CD, Docker

Databases: DynamoDB, MongoDB, SQLite, PostgreSQL

Integrations & Platforms: Stripe, OpenAI API, Firebase, n8n, Apple HealthKit, Android Health Connect
