EDUCATION

Adelphi University Garden City, NY

Bachelor of Science (BS), Computer Science (Software Engineering track, Cybersecurity Minor), FALL 2025

Current GPA 3.956

HONORS & Awards

- Adelphi National Award, Presidential Scholarship, and Supplemental Presidential Scholarship, Dean's List (7 Semesters)
- Cambridge Science Student of the Year Award (2018) , International Math & Science Olympiad (IMSO) – **3rd Place** (2016)

WORK EXPERIENCE

AND GLOBAL Pte Ltd - Frontend Developer Intern, Ulaanbaatar, Mongolia (06/2025 – 08/2025)

- Refactored and optimized key features for the Borrower and Admin Portals using React/NextJS, directly enhancing the user experience for multiple complex financial products.
- Developed custom React hooks to centralize data fetching and state logic, slashing redundant API calls by an estimated 30% and creating a more maintainable state architecture.
- Led a collaborative refactor of core summary components to ensure accurate display of financial data, reducing user confusion and potential for error for both borrowers and administrators.
- Contributed to an Agile team environment by actively participating in GitLab code reviews and CI/CD pipelines, adapting to changing requirements in a live codebase.

The Global Career Accelerator - Web Development Trainee, Remote (08/2025 - 12/2025)

- Used HTML, CSS, Bootstrap, and JavaScript to create dynamic web applications, games, and other interactive, fully-functioning web experiences
- Applied UX principles by creating low and high-fidelity Figma prototypes for two applications, conducting peer feedback sessions to iterate on designs before development.
- Collaborated with a global team to complete technical tasks and contribute to code reviews.

Adelphi University - Garden City, NY

Math Tutor – Learning Resource Program (09/2024 – 12/2025)

- Worked with students with learning disabilities, tailoring study strategies for math and computer science courses to match individual learning needs.
- Created custom study guides and practice problems, enabling students to build confidence and achieve significant progress.

Tutor & Teaching Assistant– Math & Computer Science Department (01/2023 –12/2025)

- Tutored students in Calculus I & II , computer science courses, and statistics courses, breaking down complex concepts into clear, step-by-step problem-solving methods.
- Supported programming labs in Python, debugging code and reinforcing problem-solving fundamentals.

PROJECTS

Campus Connect – Unified Marketplace for Students -

campus-connect-csc-482.vercel.app

- Built an ecommerce website where students buy and sell textbooks, dorm supplies and digital study materials, by integrating and testing Stripe API for secure payments.
- Developed dynamic, responsive product interfaces and implemented Zustand-based state management for navigation, cart persistence, and real-time UI updates.
- Created a real-time chat page using Firebase that lets buyers and sellers coordinate meetups, set meeting locations on Google Maps, and send messages—complete with blocking/unblocking features and rate limiting to prevent spam.
