

# DASHNYAM PUNTSAGNOROV

Garden City, NY 11530 • 516-613-1158 • dadhaap@gmail.com

## EDUCATION

**Adelphi University** Garden City, NY

Bachelor of Science (BS), Computer Science (Software Engineering track, Cybersecurity Minor), *Expected FALL 2025*

Current GPA 3.956

## HONORS & Awards

- Adelphi National Award, Presidential Scholarship, and Supplemental Presidential Scholarship, Dean's List (7 Semesters)
- Cambridge Science Student of the Year Award (2018) , International Math & Science Olympiad (IMSO) – **3rd Place** (2016)

## WORK EXPERIENCE

**AND GLOBAL Pte Ltd - Frontend Developer Intern**, Ulaanbaatar, Mongolia (06/2025 – 08/2025)

- Engineered and optimized key features for the Borrower and Admin Portals using React/NextJS, directly enhancing the user experience for multiple complex financial products.
- Architected custom React hooks to centralize data fetching and state logic, slashing redundant API calls by an estimated 30% and creating a more maintainable state architecture.
- Led a collaborative refactor of core summary components to ensure accurate display of financial data, reducing user confusion and potential for error for both borrowers and administrators.
- Developed page layouts and portals using Figma prototypes.
- Contributed to an Agile team environment by actively participating in GitLab code reviews and CI/CD pipelines, rapidly adapting to evolving requirements in a complex, live codebase.

**The Global Career Accelerator - Web Development Trainee**, Remote (08/2025 - 12/2025)

- Used HTML, CSS, Bootstrap, and JavaScript to create dynamic web applications, games, and other interactive, fully-functioning web experiences
- Applied UX principles by creating low and high-fidelity Figma prototypes for two applications, conducting peer feedback sessions to iterate on designs before development.
- Collaborated with a global team to complete technical tasks and contribute to code reviews.

**Adelphi University - Garden City, NY**

**Math Tutor – Learning Resource Program** (09/2024 – 12/2025)

- Worked with students with learning disabilities, tailoring study strategies for math and computer science courses to match individual learning needs.
- Created custom study guides and practice problems, enabling students to build confidence and achieve measurable progress.

**Tutor & Teaching Assistant– Math & Computer Science Department** (01/2023 –12/2025)

- Tutored students in Calculus I & II , computer science courses, and statistics courses, breaking down complex concepts into clear, step-by-step problem-solving methods.
- Supported programming labs in Python, debugging code and reinforcing problem-solving fundamentals.

## PROJECTS

**Campus Connect – Unified Marketplace for Students -**

**campus-connect-csc-482.vercel.app**

*React, Vite, TailwindCSS, Zustand, AWS Lambda, API Gateway, DynamoDB, S3, CloudFront, Secrets Manager, Firebase Admin SDK, Stripe API*

- Spearheaded development of a **serverless marketplace platform** enabling students to trade digital and physical study materials, leveraging a modern full-stack architecture across AWS and React.
- Built **secure authentication and authorization** using custom JWT authorizers and AWS Secrets Manager, ensuring stateless identity and consistent API access control.
- Developed **dynamic, responsive product interfaces** and implemented **Zustand-based state management** for seamless navigation, cart persistence, and real-time UI updates.
- Engineered backend integrations using **AWS Lambda, DynamoDB, and Firebase Admin SDK** to handle real-time messaging, data persistence, and event-driven workflows within a scalable cloud environment.
- Leveraged **AWS Lambda layers** to share business logic, models, and utilities, promoting **code reuse and maintainability** within a monorepo architecture.

## TECHNICAL SKILLS

Python, Java, C/C++, SQL, React, Next.js, TypeScript, TailwindCSS, Node.js, Express.js, AWS (Lambda, DynamoDB, S3), Firebase, Zustand, MongoDB, Git/GitHub, Figma, Linux CLI, Agile collaboration, Figma
